

Mrs. Brace thinks if you will make us a
long visit. She can find you a very good
wife here - Very rapidly however, that is a
branch of botanical history - you have not
much taste for - At any rate, we are now
so situated as to make your visit pleasant,
provided you come in my vacation, which
will end about the 14th or 15th of May -
be here by the teeth if you can

Yours. cordially

J. D. Brace

J. C. Torrey -

Dr. John Torrey

Dear Sir

I answer your letter thus soon

that the lists, you was so kind as to request me to make out, should be with you before you go to Princeton. I shall send you a list first of all the species mentioned in your Compendium which ~~are~~ not in my herbarium; in case you have any of them, they will be acceptable. I shall then, if I have room, give a list of some species from Europe that I desire & in a subsequent letter make some remarks on American plants.

<i>Callitriche terrestris</i>	<i>Panicum hispidum</i>	<i>Ceanothus herbaceus</i>	<i>Melasthema divicium</i>
<i>Helianthus maritimus</i>	" <i>Scoparium</i>	<i>Euponymum corymbosum</i>	" <i>hybridum</i>
<i>Anemone americana</i>	" <i>macrocarpum</i>	<i>Vitis cuneata</i>	<i>Helianthus latifolius</i>
<i>Veronica veniformis</i>	" <i>involutum</i>	" <i>repens</i>	<i>Trillium pusillum</i>
<i>Gratiola megalecarpa</i>	" <i>verrucata</i>	<i>Cistus amplexifolius</i>	<i>Rumex verticillatus</i>
<i>Lindernia monticola</i>	" <i>longifolia</i>	<i>Ribes hirtellum</i>	" <i>acutus</i>
<i>Hemianthus</i>	<i>Hebecladus alpina</i>	" <i>oxyanthoides</i>	<i>Aesculus glabra</i>
<i>Utricularia inflata</i>	<i>Digitaria serotina</i>	<i>Hamamelis</i>	<i>Oenothera ramosa</i>
" <i>minor</i>	<i>Halimolobos succulentum</i>	<i>Conolobus obliquus</i>	" <i>parviflora</i>
" <i>setacea</i>	<i>Galium boreale</i>	<i>Cyclopia acuminata</i>	" <i>minima</i>
<i>Lycopus uniflorus</i>	" <i>microanthum</i>	<i>Hebecladus pubescens</i>	" <i>incana</i>
<i>Monarda clinopodia</i>	" <i>brevifolium</i>	<i>Chenopodium vernalis</i>	" <i>laetevirens</i>
<i>Trisela cuneata</i>	<i>Diandia</i>	" <i>glauca</i>	" <i>pusilla</i>
<i>Scirpus glaucus</i> (ditto very distinct species?)	<i>Houstonia citriolata</i>	<i>Salicaria</i>	<i>Epilobium malle</i>
" <i>cuneatus</i>	" <i>pubescens</i>	<i>Alnus nemoralis</i>	<i>Muricis</i>
<i>Rhynchospora cernua</i>	<i>Ludwigia uniflora</i>	<i>Celtis occidentalis</i>	<i>Acrobarbatum</i>
" <i>capa</i>	<i>Plantago canadensis</i>	" <i>pernixa</i>	<i>Lippocarpus</i>
<i>Cyperus erythrorhizos</i>	" <i>maxima</i>	<i>Eryngium yuccifolium</i>	<i>Baccinium leucostomum</i>
" <i>tenax</i>	<i>Exacum</i>	<i>Hydrocotyle vernalis</i>	<i>Thiodendron viticolum</i>
" <i>compressus</i>	<i>Prunella (bata)</i>	" <i>campanula</i>	" <i>calceolacum</i>
" <i>odoratus</i>	<i>Fraxinea</i>	<i>Cnicus cetriflorus</i>	" <i>arborescens</i>
<i>Paspalum stolonifera</i>	<i>Artemisia nanotensis</i>	<i>Myosotis perenne</i>	" <i>tropidum</i>
<i>Trichodanum elatum</i>	<i>Lagotis apetalus</i>	<i>Myosotis perenne</i>	<i>Pyrola minor</i>
<i>Agnostis compressa</i>	<i>Potamogeton compressus</i>	" <i>terrestris</i>	<i>Cassia fasciculata</i>
" <i>serotina</i>	<i>Lithospermum denticulatum</i>	<i>Primula</i>	<i>Hydrangea radiata</i>
<i>Anemone brevifolia</i>	<i>Quercus muhlenbergii</i>	<i>Podocarpus (bata)</i>	<i>Cucubalus nives</i>
<i>Viola latifolia</i>	<i>Primula</i>	<i>Labradoria campocaulis</i>	<i>Cerastium semidecandrum</i>

LIBRARY
NEW YORK
BOTANICAL
GARDEN.

A. A. S. W.

I have intruded upon your valuable time, at present, to obtain some information that I need, trusting that our old intimacy may plead my excuse.

I am desirous of obtaining the fifth and any succeeding volume that may have been published, of DeCandolle's Prodro-
mis. Our booksellers, here, are unable to obtain them for me. I wish again to take up Botany & revise some of my old knowledge of various branches of bot. This in many branches, I am fifteen years behind the age, having had other employments to occupy my time. Most in Botany, not so much so.

I wish to ascertain whether any other volume
of De Candolle has reached that country
since the fifth - & from whom in New York
I could obtain them. Do you wish to
sell your fifth number?

Will you likewise inform me how many num-
bers of the third volume of the transactions
of the N. Y. Lyceum have been published, &
whether the late numbers could be ob-
tained separately - I have the numbers
that were published about eight years
ago.

I should like to hear, also, respecting
yourself, your family, your situation,
your employments &c. - The last, I heard
from you, was by means of a pamphlet
you sent me respecting the N. Y. Universi-
ty.

I still continue at the head of that
large school, & find my time fully em-
ployed in attending to its details.
Can you not make it convenient to pay
me a little visit during this warm wea-
ther, I should be very happy to see

you indeed. I am so circumstanced now
that a visit from you would afford
me much pleasure.

Allow me to hear from you soon.

Respectfully
Yours

J. P. Brace
